

Northside Park Renovation Project

Northside Park Closures

The majority of Northside Park will be closed for renovations beginning October 5, 2009 and remain partially closed through 2010. Our contractor will be staging equipment in the west parking lot and utilizing the warming shelter as a construction office. Due to construction traffic around the park and bridge removal, access through the park will be unavailable. Pedestrians will need to detour around the park utilizing Prairie Avenue, Main Street, and Cole Avenue.

The pool area will be open for summer use. Other areas may appear to be complete by early summer, but will have new vegetation that requires time to become established before being opened to use.

Access to the tennis courts, ball fields, and girl scout cabin will remain open throughout construction. However, parking for these areas will be limited to the southeast lot and patrons will need to be aware of construction traffic. The playground will remain open until it is closed for renovation in summer 2010. These areas are shown on the attached plan.

-  Park Areas to be closed during construction
-  Pool Open for Summer 2010
-  Playground closed for renovation summer 2010
-  Pedestrian Detour
